

Potting Shed Makeover

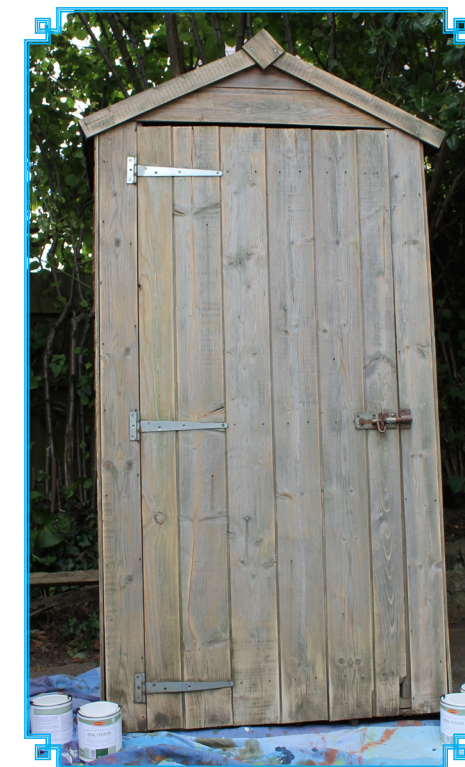

RIGHT:
Inside & out this old potting shed was in a bit of a state. The exterior had never been treated, was covered in dirt and algae & the bottom of the door was starting to deteriorate.

BELOW:
The interior of the roof was stained from holes and tears in the roof felt. A coat of Royal Exterior Forest Green instantly protected & transformed it.

LEFT:
The exterior of the shed was sanded down with a power sander to thoroughly remove all of the old dirt + algae and get the timber back to a decent surface for the wood stain to adhere to.

LEFT:
A colour palette was chosen to blend the exterior of the shed in with the garden and surrounding trees with light, contrasting shades selected for the inside to brighten an otherwise poky and dull space. Royal Exterior Jungle Green was used on the external walls with Forest Green on the trims & internal roof + floor. Lime White was painted on the diamond plus internal walls with shelves in Pond Green.

LEFT:
A calmly stunning transformation has been completed renovating a dull old potting shed in to a beautiful fun space that will now last years and make gardening sessions even more pleasurable!
